

Class 08 External Preparation Stand

Safe Access & Fall Prevention System

The Professional Standard for Railway Rolling Stock Maintenance

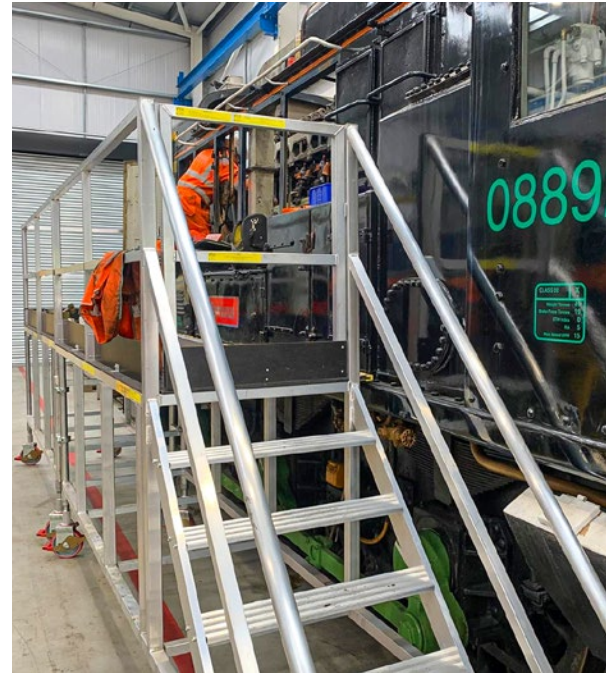

! REDUCE RISKS DURING LOCO PREPARATION

The Alto Class 08 Access Stands have been designed to give compliant access and working platforms for preparation routines on this widespread legacy class of locomotives without compromising speed and efficiency.

Manufactured from extruded 6000 series aluminium with a choice of slip resistant aluminium, phenolic coated plywood and GRP grating surfaces, the system provides an economical, compliant and durable access solution for rail environments.

✓ WHY OPERATORS CHOOSE ALTO STANDS

- ✓ Purpose built for Class 08
- ✓ Welded, lightweight, durable, corrosion-resistant aluminium construction
- ✓ Accurately designed to fit the specific class of locomotives
- ✓ Incorporates cover for shunter step
- ✓ Compliant guard-railing, integral toeboards, spring-loaded gates
- ✓ Handed geometry
- ✓ Sized to protect the whole side area in front of the cab

⚙️ OPTIONS AVAILABLE

- 200mm wheels for easy relocation in rail environments
- Height-adjustable legs to ensure accurate alignment with running plate
- Choice of platform surfaces to suit the environment and application
- Available singly or in handed pairs
