

Overview

The Alto Cup System Scaffold Stair is an all-aluminium stair unit designed to be used on system scaffolding with 1.8m bays – typically Cuplok/Scaflok/Genlok/Tradlok. A cost-effective, safer alternative to using vertical ladders.

Manufactured using structural grade aluminium for strength and reliability, the Alto Cup System Scaffold Stair is a simple and versatile solution for adding staircases to a Cup type system scaffold. Like all Alto products, the Alto Cup System Scaffold Stair is designed to be effective, durable and fully compliant with BS EN 12811.

There are three models in this range covering lift heights of 1.0, 1.5 and 2.0 metres.

Specification

WEIGHT	24.4 kg (2.0m version) 23.6 kg (1.5m version) 23.5 kg (1.0m version)
OPERATING HEIGHTS	1.0m, 1.5m & 2.0m
BAY SIZES	1.8m
TREAD WIDTH	750mm
OVERALL WIDTH	800mm
KEY FEATURES	<ul style="list-style-type: none"> - Compatible with Cuplok/Scaflok/Genlok/Tradlok system scaffolding - Durable, corrosion resistant construction - Slip resistant stair treads - Bolted construction for simple maintenance

2.0m Version

Key Features

- Designed to give scaffolders a cost-effective stair access solution with practical, reliable & compliant equipment.
- The Alto Cup System Scaffold Stair gives a rapidly deployed solution for standard lift heights.
- Made to fit 1.8m bay scaffolding systems – e.g. Cuplok/Scaflok/Genlok/Tradlok. With this product you can quickly install fully compliant stair access to your Cup system scaffold.
- The Alto Cup System Scaffold Stair can be installed without the use of any tools to lock the top hooks onto the transom.
- Three standard models in the range for the most common lift heights of 1.0m, 1.5m and 2.0m.
- Made with standardised components and an all-bolted construction, the Alto Cup System Scaffold Stair can be maintained by any competent operator.
- With a clear width of 750mm and slip-resistant extruded treads, the Alto Cup System Scaffold Stair is comfortable and convenient for the user.
