

Overview

The all new Alto Stairwell-Pro Tower has been developed and engineered to comply with all of the latest standards and overcome the ergonomic difficulties associated with existing stairwell tower products.

The Alto Stairwell-Pro Tower is integrated with the Alto Mini Tower giving owners the opportunity to maximise utilization of their tower equipment.

Fully compliant with and externally certified by the Test & Research Centre to BS 1139-6: 2022 – the Alto Stairwell-Pro Tower is the only stairwell tower to achieve this accreditation. Manufactured using the same aluminium extrusions as the MD Ladderspan Tower, the Alto Stairwell-Pro Tower gives users the same strength, durability and performance that you get from the Alto MD range embodied in a compact footprint.

Our walk-through base frames uniquely allow full height access to the staircase whilst the tower in use without creating ergonomically difficult assembly requirements. Offered with a choice of stabilisation options including stub stabilisers, conventional stabilisers and tying in solutions, the Alto Stairwell-Pro Tower is the safest, most stable, most compliant stairwell tower on the market. Available as a standalone product or as an extension kit for an existing Alto Mini Tower.

Specification

| | |
|------------------------|--|
| TOWER STANDARD | BS 1139-6:2022 |
| PLATFORM LENGTH | 1.2m long |
| TOWER WIDTH | 0.85m wide |
| TOWER LOADING | 750 kgs (0.75 Tonne) per tower |
| TUBE THICKNESS | 2.0mm extruded aluminium 6082T6 fluted tube |
| TUBE DIAMETER | 48mm diameter tube (standard scaffold tube dia.) |
| JOINT TYPE | Welded frame joint connections |
| FRAME FITTING | Offset Cone Non-Jamming spigot |
| COMPATIBILITY | Components compatible with Alto Mini Tower |
