

## Overview

The Alto Universal Stair is a versatile all-aluminium access solution for temporary works, allowing a totally compliant staircase to be installed across a range of lift heights.

Made of corrosion resistant, structural quality aluminium extruded profiles for strength and reliability, the Alto Universal Stair is a simple and versatile solution to a huge range of temporary stair access requirements.

Like all Alto products the Alto Universal Stair is designed to be effective and durable and is fully compliant with BS EN 12811 in all permissible configurations.

Compliant handrails are also available for all height variations.

## Specification

<b>STANDARD</b>	BS EN 12811
<b>LIFT HEIGHTS</b>	0.4m to 3.4m
<b>TREAD WIDTHS</b>	630mm clear internal width
<b>TREAD LOADING</b>	200kg UDL
<b>STRINGERS</b>	48mm dia. 6082T6 extruded aluminium tube
<b>HANDRAILS</b>	Quick-fitting aluminium handrails

## Key Features

### Fully Compliant

The Alto Universal Stair is designed to provide a cost effective stair access solution with practical, reliable and compliant equipment designed to fit 48mm tube and fitting scaffolding. With this product you can quickly install a fully compliant stair access to almost any situation.

### Minimum tools

The Alto Universal Scaffold Stair can be installed using only basic tools to operate the locking mechanism and secure the fixings.

### Ease of maintenance

Made with standardised components and an all bolted construction, the Alto Universal Stair can be maintained by any competent operator.

### Adaptable

The Alto Universal Stair copes admirably with varying lift heights and floor levels, giving level treads across the permitted range of stair angles.

### Versatile

There are 6 standard models in the range spanning 0.4m to 3.4m lift heights.

### The Height of Safety

As with all Alto equipment, safety is our primary concern. Wide, slip resistant treads and simple effective, quickly fitted, compliant handrails give peace of mind to responsible management.
